

October 3, 2023

Dear Valued Customer:

PSE&G and our approved contractors are completing underground construction activities in your neighborhood to continue to provide safe, reliable service. Construction crews will soon begin actively working on the PSE&G and public right of way on Old York Road, Hedding Jacksonville Road and West Mill Lane. Please note there are no planned electric service outages as a result of this activity.

Beginning on or around Monday, October 16, 2023, underground construction activities will take place along Old York Road, Hedding Jacksonville Road and West Mill Lane to install manholes and conduit. Work hours will be between 7 a.m. and 5 p.m. Monday through Friday with a possibility for extended hours. Some unavoidable construction noise may be generated. This portion of work is scheduled to continue through the November 2023. All schedules are estimates, weather dependent and subject to change.

To safely complete this portion of work, road closures will be utilized in the work area during the work hours listed above. Detours and flaggers will be in place to redirect traffic. Residents within the work zone will have access to their property. Please notify the officer on-site and they will accommodate all access needs immediately once safety protocols are implemented. Delivery companies (UPS, FedEx, Amazon, etc.) Waste Management, the Postal Service and school buses will also be allowed in the work area. PSE&G will work with the local police to safely control the flow of traffic for motorists and pedestrians.

We appreciate your patience and cooperation as we work to complete these important upgrades to ensure safety and reliability. For questions or more information about the project, please call PSE&G's Electric Reliability Hotline at 1-800-606-0045.

Sincerely,
PSE&G Public Affairs
